

WHEN IT COMES TO SEXUALLY TRANSMITTED INFECTIONS #youdecidewhatyoushare

To prevent sexually transmitted infections (STIs),
ALWAYS USE A CONDOM

The number of STIs diagnosed in Spain
CONTINUES TO INCREASE

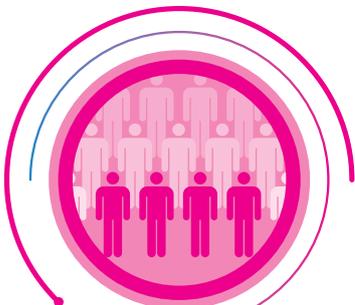

HALF OF NEW CASES
of gonorrhoea and around a third of
new cases of syphilis in Spain are
AGED UNDER 30

Sexually transmitted infections
can also be contracted
THROUGH ORAL SEX

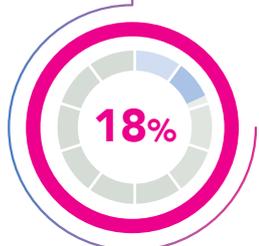

If you have even the
slightest suspicion
that you might have
an STI, see your
doctor and **TAKE
THE NECESSARY
TESTS**

**4 OUT OF EVERY
1000 PEOPLE**
in Spain has HIV

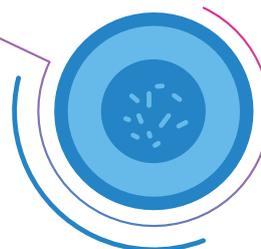

If you think you may have
contracted an infection
TELL YOUR PARTNER

It is estimated that
**18% OF PEOPLE WITH HIV
ARE UNAWARE OF IT**

**EARLY DIAGNOSIS AND
APPROPRIATE TREATMENT**
are essential for dealing with STIs

The most common STIs are:
**GONORRHOEA, SYPHILIS,
HIV, CHLAMYDIA AND
HEPATITIS B AND C**
